| <i>Treści programowe zapewniające uzyskanie efektów uczenia się: /Program contents ensuring the achievement of the learning outcomes:</i> | Construction and the operating principles of bioreactors as well as their instrumentation enabling to control and monitoring of a biotechnological process; explaining the mechanisms of separation methods and purification of products during the biotechnological process. Topics such as: discussion of the design solutions of bioreactors , tools for controlling a biotechnological process, kinetics of processes, methods for performing a biotechnological process and its balancing, a periodic process, a continuous process, a process with the recirculation of biomass, separating of biotechnological products, taking into account the operating principles and the design of devices used to carry out these processes, separation of biomass, centrifugation and filtration, fragmentation of cells, thickening processes, evaporation and cryoconcentration, crystallisation, extraction, membrane and electrokinetic processes, filtration on gels, distillation. convective drying, freeze drying, chromatographic methods. | | | | | | | |
| <i>Sposób weryfikacji efektów uczenia się/ Methods of the verification of the learning outcomes:</i> | reports, an evaluation of written papers examining the theoretical preparation for conducting experiments, exam, | | | | | | | |
| <i>Szczegóły dotyczące sposobów weryfikacji i form dokumentacji osiąganych efektów uczenia się /Details on the verification methods and of the ways of documenting the learning outcomes:</i> | reports; personal evaluation cards of the student, the content of the examination questions with the assessment, the possibility of using distance education when necessary | | | | | | | |
| <i>Elementy i wagi mające wpływ na ocenę końcową/Elements and weights influencing the final grade:</i> | The assessment of the learning outcomes consists of: 1.assessment of written works checking theoretical preparation for conducting experiments 2. presentation and analysis of observations and conclusions formulated in the reports 3. written exam The student obtains 3 partial grades (for each element). The condition for passing each element is obtaining 51% The final grade is computed based on the grades for each item. The weight of each of these components is as follows: 1-40%, 2-10%, 3-50% The condition for passing the course is to pass each element and obtain a minimum grade that is sufficient, taking into account all the elements. | | | | | | | |
